Coalition of Finance Ministers for Climate Action
November 18-19, 2019, London, UK

Miria Pigato,
co-lead of the Secretariat of the Coalition
Principle # 3: Work towards measures that result in effective carbon pricing
RECAP Principle 3: Progress so far

- Champions: Sweden and Ecuador
- Sweden hosted a Sherpa workshop on Carbon Taxation on October 3-4, 2019 in Stockholm).
- Tools are being developed to incorporate carbon pricing into fiscal policy and macro modeling.
- Collaboration with IMF, OECD, EU, Member Countries
RECAP Principle 3: Priority Actions identified in the Santiago Action Plan

Identifying technical requirements for introducing carbon pricing.

- Reducing/eliminating fossil fuel subsidies and tax expenditures
- Implementing environmental fiscal reforms, to reduce emissions, increase domestic revenues and generate positive welfare effects.
- Supporting efforts by member countries to introduce coordinated carbon pricing arrangements.

Supporting policy responses to concerns arising from domestic carbon pricing through knowledge sharing

- Protecting short-run external competitiveness
- Assessing needs for incidence analysis on how household burdens might be affected
- Ensuring that reforms are fair, participatory and effectively communicated.

Analyze the transition challenges and economic impacts of introducing carbon pricing
Proposed work program - Secretariat, CPLC, PMR, IMF, OECD, Sweden, Finland, Ivory Coast, Finland

By Spring 2020
➢ **Tools:** The Carbon Pricing Assessment Tool
➢ **Workshops:** Carbon tax workshop (pricing workshop in South Africa)
➢ **Technical Notes** on Carbon taxes, carbon price floors

By mid 2021
➢ **Tools:** PMR Guide to Co-benefits of Carbon Pricing
➢ **Training courses (French and English),** to build capacity and awareness, webinar series
➢ **Workshop** on fossil fuel subsidies, emissions trading systems and effective carbon prices
➢ **Policy briefs** (Finland leading) on fossil fuel subsidies and carbon pricing
➢ **Working Papers** on: (ii) incidence of carbon pricing reform; (ii) air pollution and health co-benefits of carbon price reform; (iii) political economy of reforms
Statement on Principle 3

“We acknowledge that there is a large gap between existing carbon prices and those needed to achieve the Paris Agreement. We affirm that this gap needs to be narrowed urgently. We also acknowledge that carbon price reforms need to be fair and just, support people’s transition toward a zero-carbon economy without threatening their livelihoods and protect the poorest and most vulnerable in society. We hereby reaffirm our commitment to take action and work towards measures that result in effective carbon pricing, to narrow the gap, while supporting people and communities through the transition.”
Discussion

• Work program: adequacy, offerings, new proposals from Sherpa
• Do you agree with the Statement?
Thank You
